

NOTICE OF THE OPPORTUNITY FOR PUBLIC COMMENT

Environmental Protection Division
Georgia Department of Natural Resources

State of Georgia
County of Fulton

To All Interested Persons and Parties

Williams Printing Company has filed an application with the Environmental Protection Division (EPD) for an air quality permit for the construction and operation of a lithographic printing facility to be located at 3900 North Commerce Drive, East Point, Fulton County, Georgia. The proposed facility will consist of two web-fed heatset lithographic printing presses, and four sheet-fed coldset lithographic printing presses. State law specifies that a permit shall be issued upon a determination by the EPD Director that the proposed facility will comply with all State and Federal regulations and requirements.

You are hereby notified of the opportunity for written public comments concerning the application for a permit to construct and operate the proposed equipment and the EPD's Preliminary Determination concerning the application. The Preliminary Determination is a summary of the technical review of the application and contains a copy of the Company's application, other supporting information submitted by the applicant, and the draft Air Quality Permit.

EPD has concluded that the Williams Printing Company application should be approved and that a permit should be granted. This conclusion is based upon evidence that the proposed project, when completed, will comply with the Division's Rules for Air Quality Control, Chapter 391-3-1; That the emissions from the facility will not cause any significant deterioration of air quality; That it will comply with the Federal Nonattainment New Source Review (NSR) Regulations, 40 CFR 51.165, including use of Lowest Achievable Emission Rate (LAER) for regulated pollutants.

The EPD has considered air toxics control in its analyses of air quality. Williams Printing Company proposes to control emissions from the heatset printing presses through the use of a thermal oxidizer to minimize emissions of air toxics and to satisfy the requirements of LAER.

The NSR regulations require the procurement of emissions offsets at a ratio of 1.3:1 to ensure that, as a whole, this proposed project will result in the reduction of VOC emissions in the Atlanta Nonattainment Area.

The Preliminary Determination is available for public review during normal business hours at the EPD Air Protection Branch Office, 4244 International Parkway, Suite 120, Atlanta, Georgia 30354, and at our internet site <http://www.air.dnr.state.ga.us/airpermit> by selecting “PSD/112(g)/NAA-NSR/PCP Permits” under the Permitting the menu. (Please note that the Internet is generally accessible from most public libraries in Georgia and at the Air Protection Branch office listed above.)

If copies are desired, the first 25 pages are free of charge, and every page thereafter costs \$0.10 per page. A copying machine for public use is provided by EPD at the Atlanta Air Protection Branch office only and is available on a first-come, first-served basis. Office hours are 8:30 a.m. to 4:00 p.m., Monday – Friday, excluding holidays.

Persons wishing to comment on the Preliminary Determination are invited to submit their comments in writing to the EPD at the above address, postmarked no later than 30 days after date of publication in the newspaper. All comments postmarked on or prior to that date will be considered by the Division in making its final decision on the permit.

Any requests for a public hearing must be made in writing within the 30 day public comment period. Such requests should specify in detail the portion of the Air Quality Control Rules, which the individual believes may not have been adequately reviewed. A public hearing may be held if the Director of the EPD finds that such a hearing would assist the EPD in a proper review of the proposed facility's capability to comply with the requirements of Federal and State Air Quality Control regulations. State laws specify that a permit shall be issued, on evidence satisfactory to the Director of compliance, with applicable State and Federal regulations and requirements.
